OBJECTIVE

Aspiring Software Developer with a strong foundation in programming, full-stack web development, and problem-solving. Seeking an opportunity to leverage my technical skills, collaborate with dynamic teams, and contribute to building innovative and scalable software solutions.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering, Bannari Amman Institute of Technology, Anna University 2024 – 2028

CGPA: 8.23/10

Higher Secondary Certificate (HSC), SRV Boys Higher Secondary School, State Board 2024

Percentage: 92%

Secondary School Leaving Certificate (SSLC), SVM Higher Secondary School, State Board 2022

Percentage: 93%

SKILLS

Programming Languages	Java, C, C++, Python, JavaScript, SQL
Web Technologies	HTML, CSS, React.js, Node.js, Express.js, REST APIs
Databases	MySQL, MongoDB, PostgreSQL
Developer Tools	Git, GitHub, VS Code, Postman, MySQL Workbench, IntelliJ IDEA, Eclipse
Core Concepts	Data Structures & Algorithms, DBMS
Cloud Technologies	Firebase
Soft Skills	Problem Solving, Communication, Teamwork, Leadership, Time Management, Adaptability, Critical Thinking, Quick Learner
Coding Platform	LeetCode, HackerRank

PROJECTS

Faculty Appraisal Application

Built a comprehensive faculty appraisal management system using **React.js**, **Node.js**, **Express.js**, and **MySQL**. The application provides faculty and administrator dashboards to manage work logs, appraisal submissions, and performance records. Successfully deployed on the college server with a domain:**facultyappraisal.bitsathy.ac.in**

Question Paper Generator Application

Developed a web-based application for generating internal examination question papers. Faculty members create and vet questions through the system, while administrators generate question papers based on the selected **Bloom's Taxonomy (K-Level)** and predefined criteria. Built using **React.js**, **Node.js**, **Express.js**, and **MySQL**. The application is currently in the final deployment phase on the college server.

NBA Document Manager Application (Ongoing)

Currently developing a centralized document management system to support the **NBA accreditation** process. The application streamlines accreditation document management, tracks real-time student-to-faculty ratios, monitors departmental improvements, and simplifies report generation for accreditation activities. Approximately **70% complete**, with deployment planned upon completion.

EXPERIENCE

Web Developer

Sept 2024 – Feb 2026

Students Special Group (SSG), Bannari Amman Institute of Technology

- Developed backend services using Node.js, Express.js and MySQL for academic web applications.

- Designed normalized relational database schemas to improve scalability and data integrity.
- Built RESTful APIs for authentication, user management and academic workflows.
- Collaborated with developers and faculty members to deliver reliable software solutions.
- Mentored more than 50 students in JavaScript, backend development and software engineering best practices.

Student Intern

Mar 2026 – Present

Personalized Skill Team, Bannari Amman Institute of Technology

- Contributed to the development of institutional web applications using React.js, Node.js, Express.js and MySQL.
- Developed backend modules and REST APIs for academic management systems.
- Worked with faculty members to implement new features and improve existing applications.
- Participated in debugging, testing and deployment activities to ensure software quality.
- Assisted in building scalable solutions for academic administration and student services.
